ROSS SECURITIES CORPORATION

FINANCIAL STATEMENT

DECEMBER 31, 2003

INDEPENDENT AUDITORS REPORT

The Board of Directors
Ross Securities Corporation

We have audited the accompanying statement of financial condition (Balance Sheet) of Ross Securities Corporation as of December 31, 2003 and the related statement of income and changes in stockholder's equity for the twelve months then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. These standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Company at December 31, 2003, and the results of its operation and its cash flows for the period then ended in conformity with generally accepted accounting principles. We find no material inadequacies in the accounting system, internal accounting control and procedures for safeguarding securities.

Cash in Fleet Bank was verified with the statements submitted by the depository as at December 31, 2003. The cash balance is verified on a monthly basis with the depositories statement.

Commissions are reported when earned. All commissions earned as at December 31, 2003 were received and deposited.

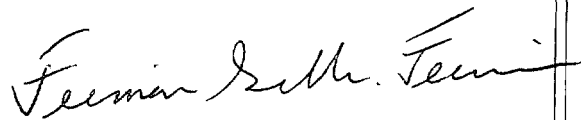

There were no subordinated Claims of Creditors at the beginning nor the end of the period.

No provision for Corporation Income Taxes has been set up in the amount of \$11,565.

The Common Capital Stock of \$15,700 results from 100 shares of common stock authorized and issued at a value of \$15.70 per share.

The Brokers required Net Capital as at December 31, 2003 is \$5,000 and the actual Net Capital as of December 31, 2003 is \$50,904 resulting in an excess Net Capital of \$45,904. No material differences or inadequacies exist between the Focus Report IIA and the audited Net Capital of the Corporation, except for the provision for corporate income taxes noted above. The net capital requirement would then be in excess of \$34,339.

Our audit was made for the purpose of forming an opinion on the basic financial statements taken as a whole. The accompanying supplemental information is presented for purposes of additional analysis and is not a required part of the basic financial statements, but is supplementary information required by Rule 17a-5 of the Securities and Exchange Commission. Such information has been subjected to the auditing procedures applied in our audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.
